PROJECTS

EDA Of Top Python & Machine Learning Channels On YouTube

It's A Data Visualization Project which predicts the best youtube channels of python & machine learning from the dataset that was coded by my team.

Used Python Libraries Like **Pandas**, **NumPy, Matplotlib, Seaborn**.

Platform Used: Jupyter Notebook, VS Code

Online Phonebook

This Full-Stack Web Application is a online phonebook manager, where anybody can create account, login with appropriate credentials & store contact details including social media ids.
The main purpose of this project is to keep safe contact details, user doesn't have to worry about losing data, login anytime & access easily.

Used **Figma** for UI Design, **HTML**, **CSS**, **JavaScript**, **VanillaJS** for forntend development & **Firebase** for storing data.
Deployed in platform **netlify**.

Inferror.com website

This Is a live Portfolio Website(Basically A Web Development Service Group).

Used **Figma** for UI Design, **HTML**, **CSS**, **JavaScript**, **TypeScript** for frontend.
Deployed in platform **GoDaddy**.

Design Projects

FlashCab: This is a Complete UI Design Of Cab Booking website.

Wedding Card Site: This is a Complete UI Design Of A Wedding Card Order website.
